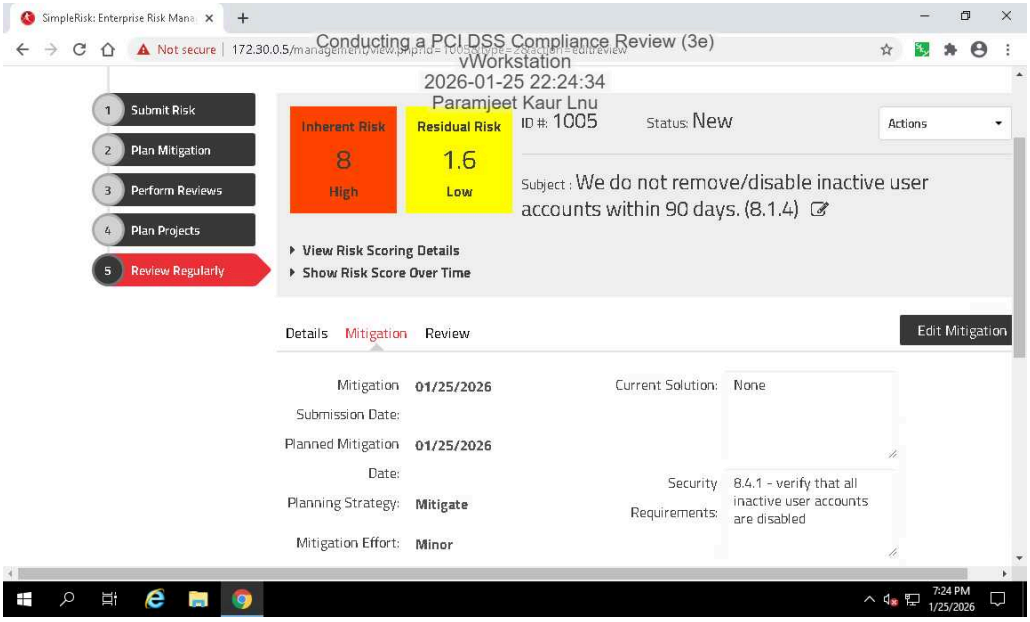
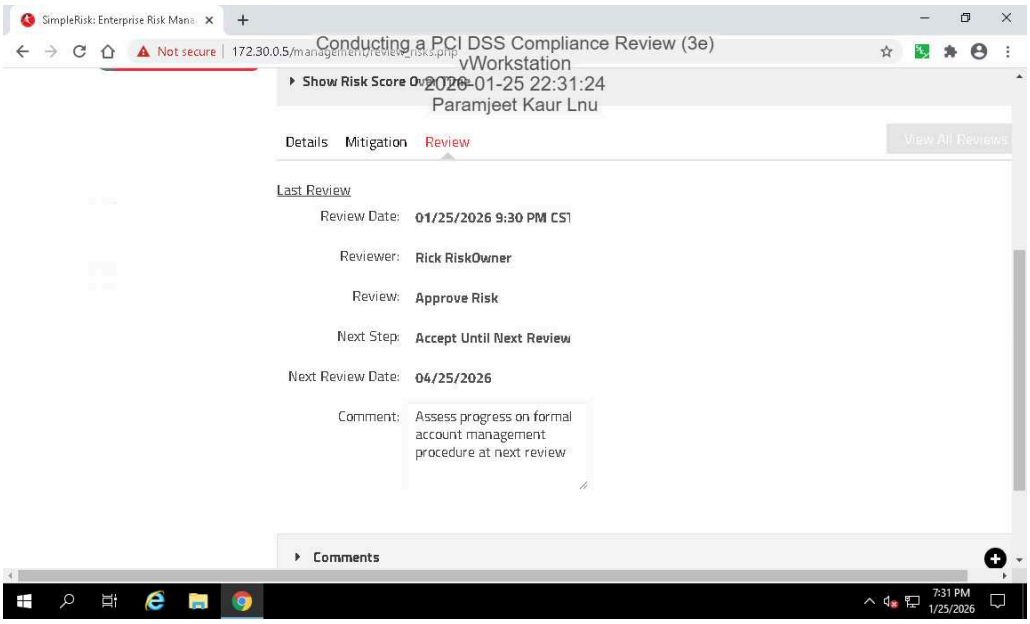
Part 3: Review Risks and Set Mitigation Actions

7. **Make a screen capture** showing the **inherent and residual risk levels**.

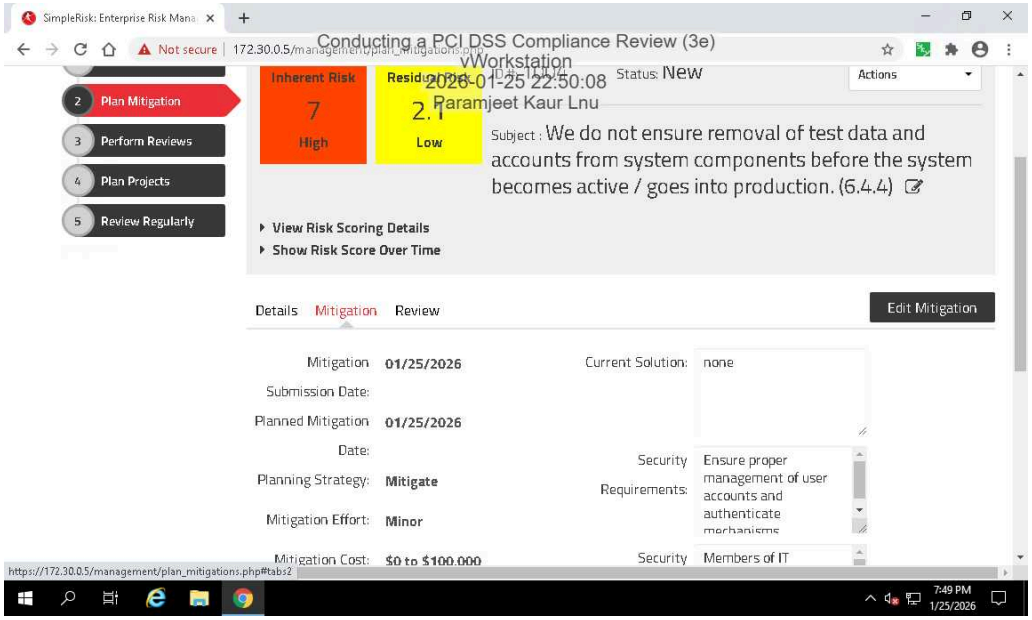


11. **Make a screen capture** showing the **completed Review tab for Risk 1002**.

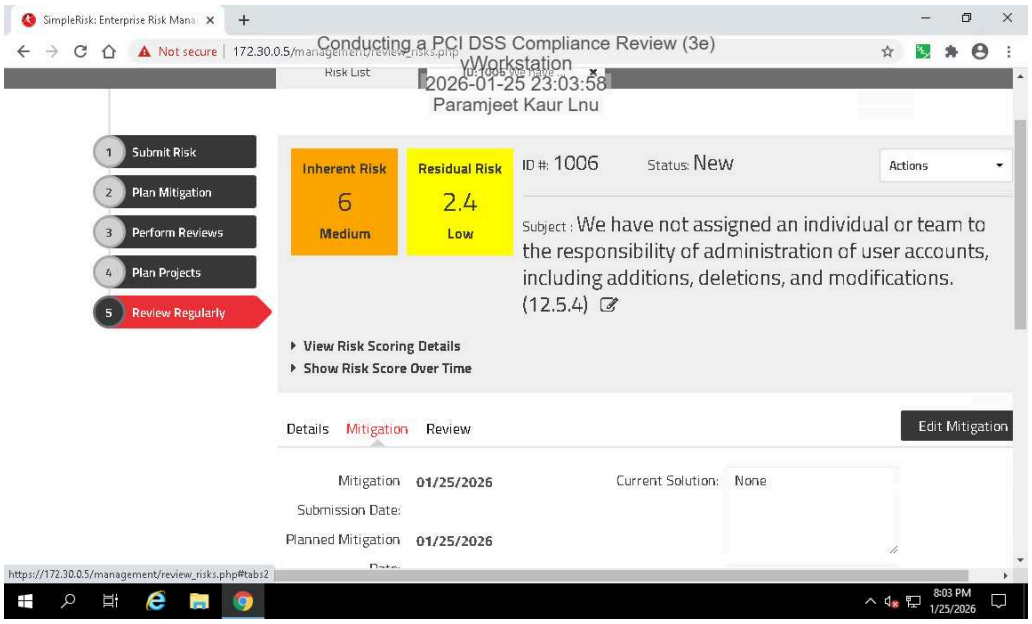


Challenge Exercise

Make a screen capture showing the **completed Mitigation tab for Risk 1001**.



Make a screen capture showing the **completed Mitigation tab for Risk 1003**.



Provide examples of your recommended mitigation actions.

Technical Mitigation Actions1. Disable and remove test accounts from production systems.Disable inactive user accounts in Active Directory. 2.Configure automatic account lockout or expiration after inactivity. 3.Enforce least-privilege access for all user accounts. 4.Enable logging and monitoring of account activity.
Procedural Mitigation Actions 1. Implement a formal user account provisioning and deprovisioning process. 2.Require HR to notify IT immediately when employees leave the organization. 3.Conduct quarterly access and account reviews. 4.Update policies to prohibit test accounts in production environments. 5.Train IT staff on PCI DSS access control requirements.
